

This development represents a significant financial outlay for our club, with current estimates for the construction totalling \$8-10M.

With the project partially funded by the Federal, State and Local governments, the original budget and available funds are no longer adequate, due to delays caused by Covid and supply chain issues. We need an extra \$2M to deliver what you have all requested and expect. We will borrow these funds initially but are looking to secure investment and contribution from fundraising, business, the community, and members to accelerate the repayment of the loan. This will ensure that the building costs do not burden the club in the future and that there are more funds from the café and ongoing operations that can fund our lifesaving operations and all other services we provide for the community and our members.
